## Key developments in the banking sector in 3M 2025

<b>Number of banks</b>	As of the end of March 2025, the banking sector comprised 517 banks, including 28 commercial banks (excluding BGK) and 489 cooperative banks. The total number of banks remained unchanged from the previous month.
<b>Total balance sheet</b>	In annual terms, <b>the asset growth rate remained unchanged from the previous year</b> at 8.8%, with the cooperative banking sector showing a higher growth rate of 17.1%. The increase in value over the first three months of 2025 was twice as in the same period a year earlier. On the assets side, net loans to non-MFIs saw a substantial rise of 29.0% y/y, while securities recorded a more modest increase of 7.6% y/y. Meanwhile, the value of assets held at the central bank experienced a significant decline.
<b>Deposits (non-MFIs)</b>	<b>Deposit growth</b> remained at a similar level to that recorded a year ago (8.5% y/y vs. 8.8% y/y). Since the beginning of the year, the volume increase was 18.2% higher than in the same period last year (PLN 20.9 billion vs. PLN 17.7 billion), mainly due to stagnation in corporate deposit volumes in March, compared to a decline in the same period of 2024. The monthly increase in deposits to non-MFIs (PLN 12.2 billion) accounted for nearly 60% of the total volume growth over the first three months of this year.
<b>Covered deposits</b>	<b>The growth in covered deposits was lower</b> than in the previous year, both year-to-date (PLN 21.9 billion vs. PLN 31.4 billion) and on a monthly basis (PLN 7.0 billion vs. PLN 13.0 billion). At the end of March 2025, the annual growth rate of covered deposits stood at 8.4% down from 9.1% a year earlier.
<b>Gross loans (non-MFIs)</b>	<b>After the first three months of 2025, the volume of loans to non-MFIs increased by PLN 27.9 billion</b> , with PLN 27.5 billion in the commercial banks sector and PLN 0.4 billion in the cooperative banks sector. This marks a significant rise compared to PLN 20.4 billion a year earlier. The increase was primarily driven by a more than twofold increase in the volume of loans to non-monetary financial institutions (PLN 13.0 billion vs. PLN 5.6 billion a year ago), as well as growth in loans to: <ul style="list-style-type: none"> <li>– Individuals: up by PLN 7.7 billion (compared to PLN 10.2 billion a year earlier), including consumer loans (+PLN 4.0 billion) and housing loans (+PLN 3.7 billion),</li> <li>– Corporates: up by PLN 7.3 billion (compared to PLN 10.7 billion a year ago).</li> </ul> As a result, the annual growth rate rose from 0.9% at the end of March 2024 to 6.1% at the end of March 2025.
<b>Financial assets</b>	The volume increase was higher than in the previous year, rising by PLN 44.0 billion compared to PLN 35.8 billion. This was primarily driven by stronger growth in foreign assets, which expanded by PLN 9.6 billion, in contrast to a decline of PLN 1.0 billion a year earlier. The monthly increase in financial assets, totaling PLN 13.3 billion, was mainly influenced by a rise in securities, which grew by PLN 19.2 billion.
<b>Asset quality</b>	<b>The quality ratio of the banking sector's loan portfolio to non-MFIs remained steady at 4.2%.</b> Compared to December 2024, the quality of corporate loans, loans to individual entrepreneurs, and housing loans showed a slight improvement, while the quality of consumer loans experienced a slight decline. The ratio of impairment provisions to non-performing loans increased from 55.6% to 56.1%.
<b>Profitability and efficiency ratios</b>	<b>Profit after tax in March 2025 was 13.7% higher</b> than in March 2024, reaching <b>PLN 10.9 billion</b> compared to PLN 9.6 billion. In the commercial banks sector profit stood at PLN 9.5 billion vs. PLN 8.3 billion a year earlier, while in the cooperative banks sector it was PLN 1.4 billion compared to PLN 1.3 billion. The increase in net income was primarily driven by higher interest income, which rose by PLN 1.77 billion (7.2%), despite an increase in total expenses of PLN 1.47 billion (12.6%). Regarding efficiency ratios on a y/y basis, there was an increase in <b>ROA, ROE</b> and improvement in the C/I ratio, while the <b>net interest margin</b> and <b>fee income margin</b> declined.

# DEFINITIONS

## KEY TERMS

**Deposits of non-MFIs** - non-financial and general government sector, as well as non-monetary financial institutions (resident), including insurance institutions, mutual funds and pension funds

**Loans for non-MFIs** - non-financial and general government sector, as well as non-monetary financial institutions, including insurance institutions, mutual funds and pension funds

**Financial assets** – loans and deposits of banks and branches of credit institutions (resident and non-resident), equity instruments (resident and non-resident), and debt instruments (resident and non-resident)

## KEY INDICATORS

$$ROA (net)_t = \frac{\frac{\text{profit or loss after tax (YTD)}}{t \text{ months}} \times 12}{\text{total assets}_t}$$

$$ROE (net)_t = \frac{\frac{\text{profit or loss after tax (YTD)}}{t \text{ months}} \times 12}{\text{core funds}_t}$$

$$\text{interest margin}_t = \frac{\frac{\text{net interest income (YTD)}}{t \text{ months}} \times 12}{\text{total assets}_t}$$

$$\text{commission margin}_t = \frac{\frac{\text{net commissions income (YTD)}}{t \text{ months}} \times 12}{\text{total assets}_t}$$

$$C/I_t = \frac{\frac{\text{total operating expenses + amortisation and depreciation (YTD)}}{t \text{ months}} \times 12}{\frac{\text{net banking income (YTD)}}{t \text{ months}} \times 12}$$

$$\text{cost of risk – annual} = \frac{\text{net provision and valuation allowances of loans to non – MFIs (last 4 quarters)}}{\text{average volume of gross loans to non – MFIs (last 5 quarters)}}$$

$$\text{cost of risk – quarterly} = \frac{\text{quarterly net provision and valuation allowances of loans to non – MFIs} \times 4}{\text{average volume of gross loans to non – MFIs (last 2 quarters)}}$$
